

# Interlocking Rubber Tile

Interlocking Rubber Tiles are designed for playground and recreational use. The tile are equipped with a built-in alignment foot which allows for precise installation. The locking mechanism runs the entire perimeter to provide a more secure installation and will help minimize any curling or tile separation.

## Product Details:

- Tiles are available in colored standard buffing top and EPDM-topped tiles. Inquire about color options for a complete list.
- ADA accessible ramps, tiles, and edges available.
- Locking technology makes installation easy, prevents tile lifting, and ensures a snug fit for years to come.
- Rain grooves underneath the tile allow water to channel and flow properly in any outdoor installations.

## Basic Specifications:

- Available in varying thicknesses to meet critical fall heights up to 10 feet.
- Manufactured in the USA and comprised of recycled rubber materials.
- Structural base helps prevent tile sagging.
