

Loose Fill Rubber Mulch

Made from recycled tire buffings, our rubber mulch is a durable, low-maintenance alternative to wood mulch, sand, or pea gravel. It provides a softer, more resilient surface to help reduce injuries from falls while maintaining a natural appearance. It will not decompose, splinter, attract insects, or wash away, ensuring long-lasting performance. Proudly made in the USA from recycled materials, it offers a safe, sustainable solution.

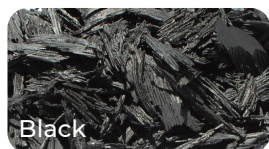

Product Details:

- Resistant to mold, animals, and insects
- Provides excellent impact attenuation
- Soft, splinter-free surface for enhanced comfort and safety
- Allows water and fertilizers to permeate
- Will not blow away or over-compact, reducing maintenance costs
- Compatible with rubber mats to minimize displacement
- Long-lasting and durable; will not deteriorate, float, or splinter
- Ideal for both residential and commercial applications

Product Size:

- Available in 50lb. bags
