TOT TURF®

INTERLOCKING TILES

Rubber Interlocking Tiles from Robertson lock together to create a floating floor effect to resist deforming in changing weather conditions. Ideal for indoor or outdoor playground flooring. These tiles are easy to install and require a limited adhesive application to avoid installation mess. Impact attenuating up to 10', these tiles are designed to provide safer play for all.

Features

- Available with two options for top layer allowing for a wide range of colors
- Checkboard patterns or other basic designs add playful surface value
- Locking technology makes installation easy, prevents tile lifting, and ensures a snug fit for years to come

Specifications

- 10 year limited warranty
- Various thicknesses available to match your playground's fall height
- Tile accessories such as corners, ramps, glue, and connectors available
- USA manufacturing and comprised of recycled rubber materials
- Structural base helps prevent tile sagging
