

PupTurf Synthetic Grass

Pup Turf is made up of a blended mono filament that is tufted and textured to create a dynamic pet product with less matting than any standard polyethylene system. The warp knit primary backing coated with the SILVERBACK™ Urethane system provides extra strength against wear from paws and claws. Also featuring

EnviroFill® infill with Microban® protection to help fight the spread of bacteria. As with all of our products, Pup Turf is constructed to be safe to the environment, humans, and our four-legged friends!

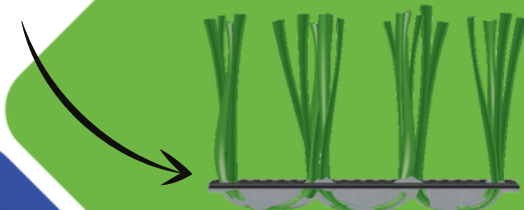

Features

- Perfect for dog parks, boarding facilities and veterinary offices
- Perforated turf layer provides for rapid drainage fostering a dirt and stain free environment
- Less maintenance – NO MOWING OR FERTILIZATION REQUIRED
- Eliminates unsightly dead grass spots and mud pits
- Odors easily flush away with water
- Includes Envirofill™ for extra protection against bacteria
- Optional drainage tiles available upon request
