TOT TURF®

RESILIENT SAFETY SURFACING

Tot Turf Supreme featuring

Featuring the world renowned Rosehill TPV rubber granules, our TotTurf Supreme surface features smaller, more compact rubber granules installed above our compliant SBR cushion layer. This surface option is long-lasting against repeated play or use. With TPV, color and design options are almost endless.

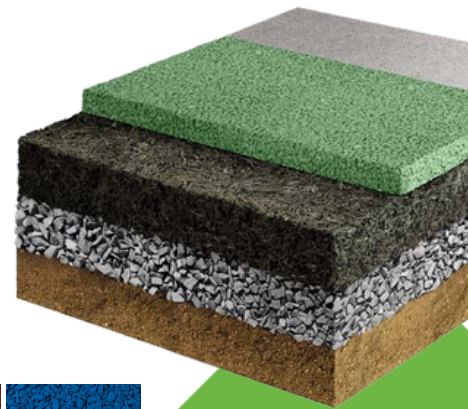

Features

- Can be installed for fall height ratings up to 12'
- Perfect surface material for highly designed spaces and themed playgrounds
- Uniform and stable for accessibility
- Provides inclusive play opportunities for children and adults with all abilities

Basic Specifications

- Our system is comprised of a rubber and binder wear course and a sub-layer made of recycled rubber combined with specialty urethane binders
- Product to be installed over asphalt, concrete, or compacted stone
- Temperature should be a minimum of 40-45 degrees Fahrenheit during installation
- Thicknesses will vary to meet specific playground equipment fall heights
- Product meets all applicable ASTM standards.

4 standard TPV colors available. Wide selection available upon request.
